

Nordic designed by Krystian Kowalski has been inspired by the Scandinavian design tradition. Statement details add a contemporary touch to the simple wooden frame. Nordic features a distinctive structure joining the legs and an innovative technique of backrest embedding which has been made possible by an advanced wood processing technology.

Nordic chairs are available in a range of wood finish colour options. As a novel visual and functional highlight, Nordic chairs can now be "dressed" in specially designed removable covers.

Also available is a variant with a permanently upholstered seat and backrest. Thanks to the great variability of fabrics, the concept will definitely prove its value in a restaurant, club and cafe, but is also a great way to make a change in residential interiors as a dining room chair.

The chairs with skids and tube legs are conveniently stackable.
