

Noti. Le Monde

Le Monde is a collection of sofas based on an innovative design idea. The backrest of the sofa consists of a combination of pillows with a special concealed frame, giving the sofa a unique impression of lightness, and delivering comfort and functional performance.

The sofa, which was conceptualised by the Milanese designer Leonardo Talarico, is a perfect furniture item not only for home settings, but also hotel interiors.

The ingeniously designed structure of the backrest is visually attractive from every angle, making the sofa a perfect free-standing piece of furniture in open spaces.
